CORE SKILLS

AI / GENAI

LLMs • RAG • Agentic AI
LangChain • LangGraph • MCP • Embeddings
Prompt Engineering • Structured Outputs

MACHINE LEARNING

Machine Learning • Deep Learning
Transformers • LSTM • NLP
Recommendation Systems • Time Series

ENTERPRISE

SAP S/4HANA • ABAP • OOABAP
RAP • CDS • HANA • AMDP
OData • SAP BTP • REST APIs
SQL / SQL Script • Integration

EDUCATION

M.Tech — Data Science & ML
PES University, Bengaluru
2024–2026

MCA
RNS Institute of Technology
2011–2014

BCA
School of Management Sciences

RECOGNITION

Multiple Spot Awards
Problem Solving
Performance Improvements
Appreciation for Technical Depth & Database Design

RAVI KUMAR GUPTA

AI ENGINEER | GENERATIVE AI | AGENTIC AI | SAP S/4HANA

12+ Years Enterprise Engineering • AI / ML • GenAI • Enterprise AI

PROFESSIONAL SUMMARY

Enterprise software engineer with 12+ years of experience designing and delivering complex, high-quality SAP and enterprise solutions. Deep expertise in problem decomposition, solution architecture, backend engineering, data-intensive processing, performance optimization, APIs, and enterprise integration. Hands-on transition into AI through Machine Learning, Deep Learning, Generative AI, RAG and Agentic AI. Combines strong engineering discipline with emerging AI capabilities to build precise, reliable, maintainable solutions for complex business problems.

SELECTED ENGINEERING IMPACT

- Reduced an AMDP API response time from 25 minutes to 26 seconds through architectural restructuring using SQL pushdown, CDS, and table functions.
- Reduced pricing data migration execution time by 80% through architectural restructuring using CDS and table functions.
- Designed reusable approaches for parallel processing, CRUD operations, logging, exception handling, and enterprise integration.
- Led technical POCs and feasibility evaluations on SAP BTP — HANA Data Lake for large-scale data scenarios and SAP AI Core / AI Launchpad for enterprise AI deployments.

AI & GENAI PROJECTS

RISK ASSESSMENT — SAP AI / RAG INITIATIVE

ABAP • Python • FastAPI • HANA ML • RAG

- Built a RAG-based semantic search solution over ABAP ATC content using SAP HANA Cloud, enabling contextual retrieval and error explanations.
- Developed FastAPI services for document processing and semantic search and integrated the capability with ABAP using OAuth 2.0.

CODEATLAS — AI ARCHITECTURE INTELLIGENCE / TAM GENERATOR

Python • LangGraph • LLMs • MCP • Mermaid

- Built an experimental agentic workflow that analyzes user stories and legacy code context and generates architecture diagrams using structured LLM outputs and Mermaid.
- Implemented conversational state, thread-based persistence, structured extraction with Pydantic, and tool-driven execution.
- Explored MCP-based tool integration for connecting AI workflows with external tools.

DEEPTICKER — STOCK INTELLIGENCE & PREDICTION PLATFORM

Python • TensorFlow • LSTM • Transformers • FastAPI

- Designed an end-to-end platform for market-data ingestion, feature engineering, technical indicators, sequence construction, deep learning, and prediction APIs.
- Implemented LSTM and Transformer-based approaches for next-day stock-price prediction and evaluated models using RMSE, MAE, and R^2.
- Evolving the platform toward Industry Intelligence, and AI-assisted financial research.

CUSTOMER360 — MULTI-DOMAIN RECOMMENDATION SYSTEM

M.Tech Capstone • Python • FastAPI • KNN • K-Means • SVD • NCF

- Built user segmentation and recommendation pipelines using EDA, K-Means clustering, KNN, SVD, and Neural Collaborative Filtering.
- Designed reusable preprocessing and prediction workflows and exposed recommendation services through FastAPI.

ENTERPRISE ENGINEERING DEPTH

12+ years across SAP ERP / S/4HANA, HANA, SAP BTP, HANA Data Lake, enterprise APIs, backend development, data modeling, integration, performance engineering, and production systems.

RAVI KUMAR GUPTA

PROFILE

AI Engineer
Enterprise AI
SAP AI Engineer
GenAI / Agentic AI

ENGINEERING STRENGTHS

Problem Decomposition
Solution Architecture
Precise Implementation
Performance Optimization
Data Modeling
Enterprise Integration
Production Quality
Reusable Design

TECHNICAL DEPTH

ABAP 7.5 • OOABAP • RAP
CDS • AMDP • OData
HANA • SQL / SQLScript
SAP BTP • REST • RFC

AI STACK

Python • LangChain • LangGraph
LLMs • RAG • MCP
TensorFlow • PyTorch
Scikit-learn • FastAPI

PROFESSIONAL EXPERIENCE

SAP LABS — 6+ YEARS

Enterprise Software Engineering | SAP | AI Initiatives

- Designed and delivered enterprise solutions using ABAP 7.5, OOABAP, CDS, AMDP, OData, RAP, HANA, and SAP BTP integration patterns.
- Worked on CDS data modeling, RAP behavior definitions, draft handling, actions, validations, determinations, OData services, and Fiori Elements annotations.
- Contributed to solution design, architecture decisions, technical POCs, feasibility analysis, and production-quality implementation.
- Contributed to AI-oriented initiatives involving agentic workflows, RAG, LLMs, and MCP-based tools.

ACCENTURE SOLUTIONS PVT. LTD. — 1.2 YEARS | SAP / ABAP / ENTERPRISE DEVELOPMENT

ITC INFOTECH — 1.9 YEARS | SAP / ABAP / ENTERPRISE DEVELOPMENT

PEOL TECHNOLOGIES PVT. LTD. — 2.8 YEARS | SAP / ABAP / ENTERPRISE DEVELOPMENT

SAP TECHNICAL DEPTH

- Application & Backend: ABAP 7.5, OOABAP, RAP, CDS, OData, REST, RFC, SQL, SQLScript.
- Data & Performance: HANA, AMDP, CDS Views, Table Functions, SQL pushdown, query optimization.
- Integration: SAP BTP, HANA Data Lake, enterprise APIs, OAuth 2.0.
- Engineering: Solution design, design patterns, reusable frameworks, logging, exception handling, performance optimization.

CURRENT PROFESSIONAL PROJECT

PRODUCT SOURCING — CURRENT PROFESSIONAL WORK

SAP S/4HANA / Enterprise Engineering

- Contributing to a complex enterprise product-sourcing solution, applying extensive SAP engineering experience to business-critical processes and high-quality solution delivery.
- Focus on understanding complex requirements, decomposing problems, evaluating solution approaches, and delivering maintainable enterprise-grade implementations.

EDUCATION & PROFESSIONAL DEVELOPMENT

- M.Tech — Data Science & Machine Learning, PES University, Bengaluru | 2024–2026
- MCA — RNS Institute of Technology, Bengaluru
- BCA — School of Management Sciences, Varanasi
- Current focus: Generative AI, Agentic AI, RAG, LLM orchestration, MCP, ML, DL, Transformers.
